

Re: 2025 Valve Spring Addendum

April 1, 2025

Because of the rising cost and declining quality of the GM 602 valve spring, MUST SEE Racing will now permit the PerFit/Engine Pro replacement spring for competition in the Race-1 sealed 602 crate engines.

MUST SEE LIGHTS Racing Series Race-1 602 engines will be permitted to use the PerFit Engine Pro replacement spring kit part # MSRVSK602. This kit consists of replacement springs, replacement keepers/locks and (16) .060 valve spring shims.

Competitors may still use GM 19154761 springs and GM 12495503 Keeper/Lock package.

ALL other related components MUST remain factory GM 602.

NEW for 2025: **ONE** .060 valve spring shim can be used under each spring.

The components listed are the ONLY options permitted.

ALL other Race-1 engine programs must stay with 100% GM factory components (unless written rules state otherwise).
