

Re: Spark Plug Notice

July 17, 2021

Race-1 has depleted all known sources for our base NGK spark plug that we prepare for many teams.

Using recommendations from some top tuners in the country we have made the move to an iridium spark plug for both the 602 and 604 engines.

Please use part number: CIINGK7+

Until further notice this will be the only plug available from Race-1, and as always, it will be Ready-to-Run where the gap has been inspected and the threads lubed. Just tighten them into your head at the proper torque, and go race.
